

DEVKISHAN KUMAR SINGH

Computer Science Engineering Student · Web Developer · Backend & Database Learner

Bhubaneswar, Odisha | kishan394069@gmail.com | GitHub | LinkedIn | LeetCode

PROFILE

Second-year B.Tech Computer Science Engineering student with a 9.60 CGPA and hands-on experience building and deploying a full-stack collaboration platform. Strong foundation in C, Java and object-oriented programming, with growing skills in backend development, SQL and databases. Completed industrial training in AWS and introductory data engineering. Eager to contribute to an internship through disciplined learning, problem-solving and practical development experience.

EDUCATION

B.Tech, Computer Science & Engineering — Silicon University | Bhubaneswar, Odisha | 2025–2029

CGPA: 9.60/10 · Semester 1 SGPA: 9.70 · Semester 2 SGPA: 9.50 · Class X: 87.80% · Class XII: 81%

TECHNICAL SKILLS

Languages: C, Java, object-oriented programming, basic Python

Web & backend: HTML, CSS, Node.js, Express.js, Socket.IO; currently learning Java backend development

Databases & platforms: SQL, MySQL, Supabase authentication/database, Render deployment

Developer tools: Git, GitHub, basic Linux commands, responsive web development

PROJECTS

Synapse — AI Prompt Collaboration Platform | Full-stack project | 2026

[Live Demo](#) | [GitHub Repository](#)

- Built and deployed a team workspace for creating, branching, versioning and testing production prompts.
- Configured Supabase authentication and database workflows with administrator, prompt engineer, tester and viewer permissions.
- Implemented real-time team chat using Socket.IO and email-based team invitation/verification workflows.
- Integrated Gemini and Groq for side-by-side A/B prompt testing, with result acceptance and version rollback.
- Deployed the application on Render and configured a verified custom domain for production access.

INDUSTRIAL TRAINING

AWS Masters & Introduction to AWS Data Engineering | Ingenious-TechWorld | 25 May–29 June 2026

- Completed training in AWS fundamentals, cloud infrastructure concepts, database basics and introductory data-engineering workflows.
- Applied the learning through a practical website-hosting and database integration project.

ACHIEVEMENTS & PARTICIPATION

- CodeVerse, NIRMAN 5.0 — Silicon Innovation & Promotion Cell, Silicon University (November 2025).
- Reverse Engineering, RISE 2026 — Silicon Achievers' Club, Silicon University (April 2026).
